

Brutus

SEWER DEPOT INC.

Brutus Crawler

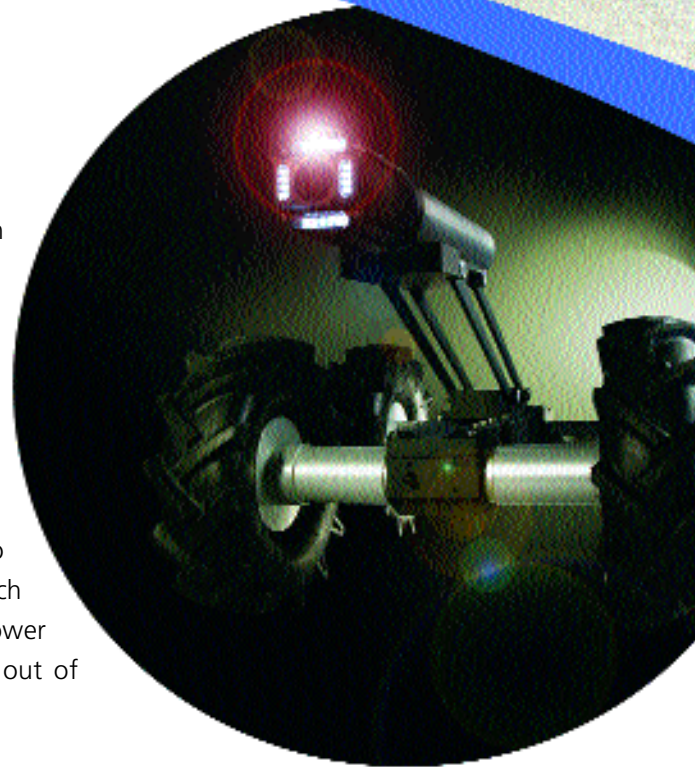

Say hello to dirty, greasy, debris-ridden pipes.

If debris has gotten between you and smooth mainline inspection, a Brutus Crawler is what you need to take you to places you have never been before.

With heavily treaded wheels and, when fully loaded, up to 120 lbs of "presence," a Brutus crawler can plow through some of the toughest obstructions. And if things do get too thick even for this machine, a clutch that automatically disengages when the power supply is cut allows you to pull the crawler out of the pipe with no damage to the unit.

Brutus can not only handle obstacles, it can cover distances, traveling as much as 2,000 feet from a single insertion. Gone are the days of digging holes to retrieve stranded equipment.

Brutus Crawler—Track Farther, Dig Less and Inspect More.

Adaptable to a wide range of pipe diameters

*PTC-360 Camera and controller not included.

Brutus

WHEELED MAINLINE TRANSPORTER

Specifications

Dimensions

Weight 75-125 lbs. (34-57 kg)
